SUMMARY (PROFILE/PROJECTS):

As a seasoned software engineer, I bring a wealth of expertise in Android development, React, and Node.js to the table. I have a proven track-record of creating robust and user-friendly applications that cater to the diverse needs of users. With proficiency in tools like Android Studio and frameworks like Flutter, I have developed a range of Android applications that deliver exceptional user experiences.

My experience spans over 2 years in Java and more than a year in Kotlin, allowing me to build and publish multiple successful applications on the Play Store.

During my ongoing tenure at Tech and Beyond, I have continued to be a crucial part of the team responsible for developing the weighbridge application. In this role, the backend technology stack is built upon Java, with the Spring Boot framework.

Java, being a highly robust and widely used programming language, offers a strong foundation for the backend of our application. The Spring Boot framework, in turn, complements Java by simplifying the configuration and development process. This combination ensures that our application remains performant, reliable, and scalable.

As part of this project, I have been responsible for the backend development, which involves designing and implementing the core logic of the application. With Java and Spring Boot, I have leveraged the capabilities of these technologies to create a stable and efficient backend architecture. This ensures that data flow, transaction processing, and business logic are handled seamlessly and securely.

EMPLOYMENT HISTORY:

12.2021- To Date   **TECH AND BEYOND, SOFTWARE ENGINEER**
- Developed and managed android application for monitoring weighbridge station transactions and other activities.
- Developed and managed a ground-breaking application aimed at revolutionizing the weighbridges industry.
- Implemented key features and functionalities to enhance user experiences.
- Actively participated in team meetings, code reviews, and knowledge sharing sessions to foster continuous improvement.
- Took ownership of assigned tasks and ensured timely delivery while maintaining code quality and best practices.
- Performed maintenance on developed application.

07.2021- 09.2021	**TRACOM SERVICES LIMITED, POS DEVELOPER INTERN**
	- Conducting tests and performance reviews on already developed applications.
	- Writing code

EDUCATION:

04.2019 – 12.2022	**KCA UNIVERSITY**
	Bachelor of Science
	Degree in Information Technology

02.2015 – 12.2018	**MUSINGU BOYS HIGH SCHOOL**
	Kenya Certificate of Secondary Education

TRAINING:

06.2022 – 12.2022	**GOOGLE AFRICA DEVELOPERS SCHOLARSHIPS**
	Android Developer Track
	Associates Developers Certification

03.2021 – 06.2021	**TRACOM SERVICES LIMITED ACADEMY**
	Fullstack Developer Training
	Certification

SKILLS PROFILE:

- ✓ Skills:
  - Java, Kotlin ,JavaScript
  - Spring boot , ReactJs and NodeJs
  - Git (GitHub and Bitbucket)
  - MySQL, MongoDb and SQlite
  - Team work and communication skills
- ✓ Languages:
  - English
  - Swahili
- ✓ Certificates:
  - Udacity nano-degree courses on android development.
  - Associates Android Developer (GADS)

ADDITIONAL INFORMATION:

- ✓ Hobbies:
  - Playing field hockey
  - Listening to music
